Program Overview

- Acquire Emotional Intelligence skills that are globally in-demand skills and have gained huge significance, especially over the last two decades.
- Today's leaders across the globe leverage the learning from these skills to better manage their employees and learn to handle tough and difficult situations with more calmness and positivity, especially in critical situations.
- Learn the strategies of successful leaders who have used emotional intelligence by working on activities that will help you to apply each strategy immediately.
- Contemplate on why it is important to accept the reality and also how these skills can help you approach problems in more of a rational manner than in an emotional one.
- Finally, understand how acquiring these skills and learning these strategies can help you effectively negotiate through difficult situations and yet help you stay positive like positive leaders do in these moments.

COURSE DURATION

- 4 Weeks
- 4 hours per week inclusive of both online and offline for practical sessions.
