FRENCH CLUB ACTIVITY

Teach and Learn: Exploring Livres Cartonnés

The French Language Department orchestrated an engaging and interactive teaching activity on 3/1/2024, centered around bilingual board books (Livres Cartonnés). Each book was designed to focus on a specific theme, including Vegetables (Légumes), Colors (Couleurs), Fruits (Fruits), and Birds (Oiseaux), among others. These carefully chosen materials were designed to make language learning enjoyable while helping students expand their French vocabulary in a lively and memorable way.

For the activity, students were seated in teams, with each group assigned one of the board books. Their task was to explore and master the content of their assigned book, and then creatively teach it to their classmates. The sessions were brimming with enthusiasm as students actively demonstrated vocabulary and concepts, emphasized correct pronunciation, and devised innovative ways to introduce the material, fostering an engaging learning atmosphere.

This interactive initiative yielded remarkable outcomes. Students not only enriched their vocabulary but also gained confidence in their spoken French. The activity also proved to be an excellent platform for strengthening teamwork and nurturing teaching skills, as each group prepared to deliver an effective presentation. The participatory nature of the sessions further encouraged peer interaction and collective learning.

The feedback was overwhelmingly positive. Students expressed that the activity offered an enjoyable approach to learning new words, making the process both fun and effective. Their enthusiasm and active engagement were noticeable throughout the session, demonstrating the initiative's success.

Overall, this thoughtfully designed activity seamlessly blended language acquisition with active participation, creating a dynamic and interesting learning environment. It not only deepened students' connection to the French language but also fostered a sense of camaraderie and creativity, making it a resounding triumph.
